

CLAIMS

What I claim as my invention is:

A cleaning device for paint brushes, rollers and pad applicators comprising:

1. A two sided base for left and right hand use.
2. A semicircular cutout, which conforms to the shape of paint rollers.
3. Each side has a scrub board consisting of multitude of notches.
4. Has the shape of conventional paint brushes.
5. Has a hole in handle for storing along with paint brushes.
6. One piece construction can be made from a variety of materials wood, plastic, or metal.
7. The size can vary from a small size for cleaning an artist brush to a large size for a 4" house painters brush.
